

MINI GRIP

28%
SMALLER

STD GRIP

SMALLER DIAMETER. BETTER GRIP.

The STACYC 19mm Handlebar Conversion Kit is purpose-built to give your little ripper better grip and more control. The kit upgrades 12eDRIVE and 16eDRIVE bikes to the 19mm diameter MINI BAR with 28% smaller grip diameter. By reducing the grip diameter kids are able to fully grasp the handlebar the same way an adult rider grasps a traditional size handlebar. Better grip, more control, increased confidence.

FEATURES

- 28% smaller grip diameter allows kids to fully grasp the handlebar, providing more comfort and control
- Smaller diameter offers a better hold on the handlebar while operating the brake
- Complete Kit mounts in your original stem on 12eDRIVE and 16eDRIVE models
- Kit includes; 19mm handlebar, throttle assembly with wire, grips, bar plugs, shim for brake perch
- Updated throttle assembly modeled after the 18eDRIVE and 20eDRIVE with on/off button and LED indicator lights
- 560mm wide handlebar
